THE ROLE OF PSYCHOLOGISTS IN THE “FLOW-CHART OF OCCUPATIONAL MEDICINE SPECIALIST FOR ASSESSMENT OF PSYCHO-PHYSIOLOGICAL RISKS AT WORK AND MEASURES TO REDUCE STRESS” WHAT DO WE KNOW?
WHAT ARE WE ABLE TO PROVIDE?

Šibenik, October 3, 2015

B. Urh, Z. Udovičić, S. Bušurelo-Erak, J. Per-Kožnjak
The new Law on Occupational Safety and Health in the Republic of Croatia (NN 71/14, 118/14, 154/14) in Art. 51 and 52 determines the employers' obligations in preventing stress at work or in relation to work, as well as obligations in estimating risks included in the psychophysiological strains of employees.
COMMITTEE TO REDUCE STRESS AT WORK

- The employer / authorized person
- Employees / Commissioners
- Safety at Work
- Human resources
- Occupational medicine specialist
- Psychologist

TASKS

- To identify and analyze the stressors
- To identify groups and / or individuals exposed to higher risks
- To propose measures to reduce the psychosocial risks at work
